

**Production of
sewing machines**

Production of sewing machines

Relevance of the project

The textile industry of Uzbekistan is not only one of the fastest growing segments of the economy, but also a leader in attracting foreign investment and exporting products. Target parameters of the volume of production of textile and garment and knitted products for 2020-2025 confirm the stable growth in the volume of production of textile and sewing-knitted products, which, in turn, will lead to an increase in the republic's demand for sewing machines.

Advantages of project implementation

The global household sewing machine market is growing at a high CAGR during the forecast period 2020-2026. The growing interest of individuals in this industry is the main reason for the expansion of this market.

Import analysis

The total volume of imports of sewing machines in 2019 compared to last year increased 1.4 times and amounted to 274.3 thousand units. In monetary terms, this figure was 74.7 million USD.

Local partners

If necessary, assistance will be provided in the search and identification of local partners with production experience that are part of the Uzeltexsanoat Association.

Location of the project

Republic of Uzbekistan,
including in Free Economic
Zones

Key investment indicators

\$8,0 M	Estimated project cost	4 years	Payback period of the project	125	Number of new jobs created
----------------	------------------------	----------------	-------------------------------	------------	----------------------------

Production volume and revenue
